PRESENTAZIONE

Sviluppatore Full Stack con esperienza nello sviluppo di applicazioni web e mobile. Specializzato in tecnologie frontend e backend, con competenze in React, React Native, Laravel, e database SQL/NoSQL. Appassionato di intelligenza artificiale e automazione, mi occupo di progettare soluzioni scalabili e ottimizzate per migliorare l'esperienza utente. Sempre alla ricerca di nuove sfide, amo lavorare in team e sviluppare prodotti innovativi.

05/03/2014 - ATTUALE Bari, Italia

Software engineer Project Skin

SKIN focuses on innovation in the editorial product, made by those who together are all links in the production chain. For this purpose, we identified the guidelines, namely the lines of action that are an extension of the offer of products and services to the publishing world.

From needs assessment shared by the industry, it is then derived the definition of three lines of action:

1. the implementation of procedures for businesses editorial content retrieval products originally and primarily intended for printing, dividing them into elementary contents atomic semantically defined, their typological cataloging, archiving them in a database with possibility of revision / integration / development of new content, thus realizing a true platform publishing;
2. the design and implementation of prototypes of editorial products products that use proprietary content atomized, allowing their exploitation, prove flexible and easily adaptable to the target destination (publishers or end users);
3. the design and implementation of an innovative search platform, aggregation and delivery of content, accessible both via web and to mobile devices, thus realizing a custom aggregator of resources and a system of use and delivery for both single units and per unit complex .

02/02/2015 - 27/05/2015 Bari, Italia

Teacher for regional programming course Unisco Bari

- Java course teacher
- Javascript course teacher

- Android course teacher
- SQL course teacher
- HTML and CSS course teacher
